

ELECTRO-PNEUMATIC TECHNIQUES AND APPLICATION

Cost:

£600 plus VAT

Level:

Upskilling

Duration:

3 1/2 days

Overview:

Course objective: To enable delegates to build basic electro-pneumatic circuits and use the correct fault finding techniques, alongside the application of the necessary principles.

Who is it for?

Target group: Maintenance personnel supervisors and operators.

Method of delivery?

Delivered in centre at the AMAC Blackburn

Objectives

Content:

- Basic theory of electro pneumatic systems
- Directional central valves including 3/2, 5/2, 5/3
- Relays and their applications
- Delay timers
- Sequential circuit exercise
- Trouble shooting
