

INTRODUCTION TO PNEUMATIC TECHNIQUES AND APPLICATION

Cost:

£600 plus VAT

Level:

Upskilling

Duration:

3 1/2 days

Overview:

This course will allow delegates to build basic pneumatic circuits and use the correct fault finding techniques – whilst gaining knowledge on the application of the correct skills and techniques.

Who is it for?

Target group: Maintenance personnel, supervisors and operators.

Method of delivery?

Delivered in centre at the AMAC Blackburn

Objectives

Content:

- Basic pneumatic systems
- Properties and behavioural compressed air
- Actuators
- Directional control valves
- Basic circuit design
- Trouble shooting
