

PNEUMATIC TECHNIQUES & APPLICATIONS

Cost:

£600 +VAT

Duration:

4 days

Entry requirements:

None required.

Overview:

This course will cover:

- Basic Pneumatic Systems
- Properties and behaviour of compressed air
- Air Compressed and Distribution
- Actuators
- Directional Control Valves
- Basic Circuit Exercise
- Fault finding
- Application and tasks in the workplace.

Assessments:

Observation and questioning

Who is it for?

Maintenance, Personnel, Supervisors and Operators.

Aim:

A 4 day course to enable Maintenance Personnel to build basic Pneumatic Circuits and perform fault finding techniques.

Method of delivery?

Lecture, demonstration, hands-on exercise using specialised Pneumatic training equipment.

Objectives

On successful completion of the course delegates will be able to:

- Apply the principles of pneumatic safety
- Use and understand Pneumatic Terminology
- Read simple pneumatic circuits
- Build pneumatic circuits.
