TRAINING 2000

IS YOUR FUTURE IN THE AUTOMOTIVE INDUSTRY?

This is a fast-paced, hi-tech industry where you'll face different challenges every day. From using computers for diagnostic purposes to using specialist equipment for repairs, it's not all spanners and oily rags!

The important personality traits for a career in the automotive industry are a good eye for detail and the ability to follow instructions carefully. You'll also be part of a team, so good communication skills are vital. We have a multi-million pound training centre, which means our apprentices are learning using the very latest cutting-edge technology.

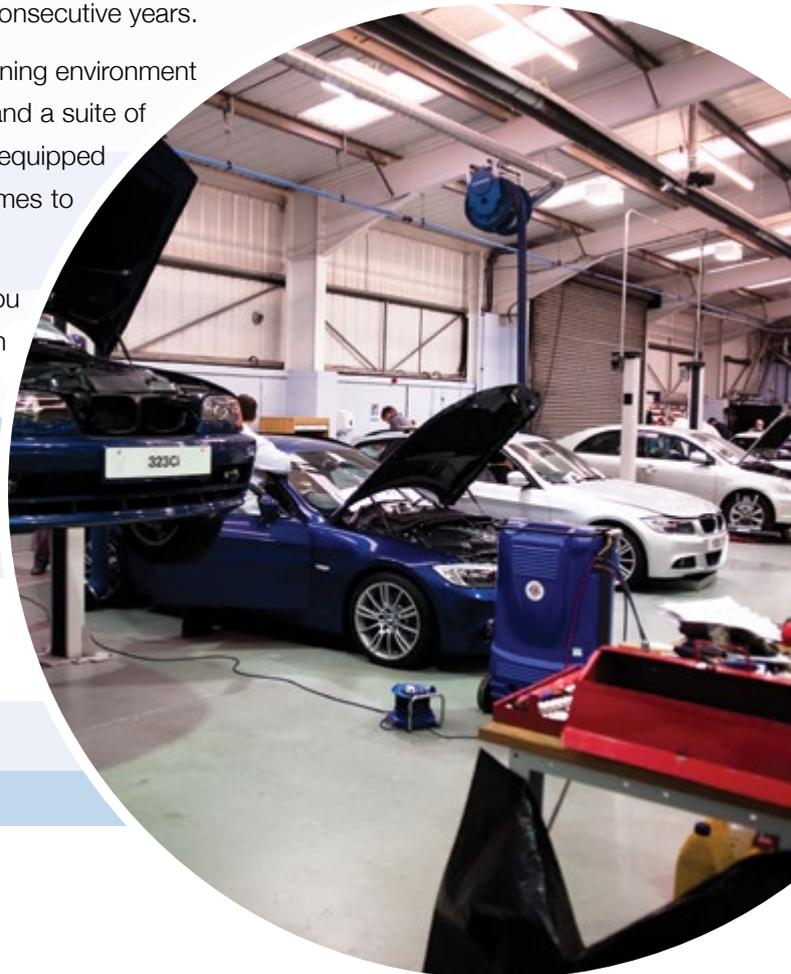

WHY STUDY WITH US?

We are proud to have a great variety of choice within our Automotive Department, with a large range of Study Programmes and Apprenticeships available, whether it is the inner workings of a vehicle or the exterior bodywork that sparks your interest.

Training 2000's IMI accredited Automotive Training Centre is widely recognised as a leading provider of skills training and accreditation to the motor vehicle and repair industry. In recent years we have been awarded the IMI 'Centre of the Year' twice and the Bodyshop Magazine National Education Award for 3 consecutive years.

The training centre offers a clean, modern, multi-functional learning environment incorporating spacious workshops with the latest technology and a suite of interactive training classrooms. All workshops are designed and equipped to provide a wide range of practical 'real life' training programmes to ensure you stay ahead of latest advancements in the industry.

Our highly experienced automotive specialists will provide you with the highest standard of quality training in your chosen vocation and will ensure you are equipped with the essential knowledge and skills.

THE LEARNER JOURNEY

The Government has raised the age that young people can leave education to 18, but what does that mean for you? Well, what it definitely doesn't mean is that you have to stay in sixth form or college, you can opt out of the classroom and into further training, by choosing a Study Programme or Apprenticeship.

Variety is a key ingredient within our programmes, so we can't tell you exactly where you will start or finish your further training with us until we discuss it with you. However, below is a possible automotive learner's journey with Training 2000.

LEVEL 2-3

APPRENTICESHIP

We offer a range of exciting Automotive Apprenticeships, with a diverse range of fields to train in. Even better, you will earn a wage and work as a company employee whilst gaining your qualification.

- Heavy Vehicle Maintenance & Repair Apprenticeship
- Light Vehicle Maintenance & Repair Apprenticeship
- Mechanical, Electrical & Trim (MET) Apprenticeship
- Vehicle Parts Distribution Apprenticeship
- Vehicle Body Repair (Panel Beating) Apprenticeship
- Vehicle Refinishing (Paint) Apprenticeship

automotive

REAL LIFE STORY: KIEREN

“An Apprenticeship was the perfect choice for me, training whilst working and earning a wage is great. I have learnt so much and I am constantly improving. My Apprenticeship in Vehicle Body Repair has really opened my eyes to the opportunities that are out there!”

WE ALSO OFFER TRAINING IN THE FOLLOWING AREAS:
