**TRAINING** 2000

## EXISTING STAFF MEMBERS

If you have employees who you would like to benefit from further training on one of our commercial courses, then we can help. Training and assessments range from Automotive Technician Accreditation (ATA) preparation courses through to ATA training in MET, Panel/Body Repair, Paint/Refinishing, Vehicle Damage Assessor (VDA), F-Gas/Air Conditioning and Smart Repair Techniques amongst other things.

Bespoke training programmes can also be designed and delivered to meet your specific requirements and certain types of training can be offered at a location to suit your needs.

We can also become your company's training partner to offer a more integrated level of service. At a time when training budgets and personnel are stretched but skills and productivity needs are growing, we can support in administering, managing and evaluating most, if not all, of your internal and external training. This level of integration also provides advanced reporting and account management facilities, all of which free you up to be more focused on the strategic side of your business practices.

### IMI ACCREDITATION:

Familiarisation and Preparation for Assessment - Paint / Panel / MET

Technician Level IMI Accreditation (ATA) - Paint / Panel / MET

Senior Technician Level IMI Accreditation (ATA) - Paint / Panel / MET

Vehicle Damage Assessor (VDA) - Part A + B Assessment

AOM006 MET Complex

AOM009 Resistance Spot Welding / MAG Welding

AOM028 Welded Panel / Section Spot / MAG / Bond / Rivet

AOM030 Welded Panel / Section MAG / MIG Braze / Bond / Rivet

AOM133 Bonding and Mechanical Fastening (Cold Repair Techniques)

### SPECIALIST TRAINING / QUALIFICATION:

Air Conditioning Refrigerant Handling / F-GAS

Level 1 Award Hybrid Electric Vehicle Awareness

Level 2 Award Hybrid Electric Vehicle Operation and Maintenance

Level 3 Award Hybrid Electric Vehicle Repair and Maintenance

Training 2000's IMI accredited Automotive Training Centre is widely recognised as a leading provider of skills training and accreditation to the motor vehicle and repair industry. In recent years we have been awarded the IMI 'Centre of the Year' twice and the Bodyshop Magazine National Education Award for 3 consecutive years.

All our workshops are designed and equipped to provide a wide range of practical 'real life' training programmes to ensure our learners stay ahead of latest advancements in the industry.

“ The future of my Service Department depends greatly on bringing new apprentices up through the ranks so they can grow with my business.

It makes my life a lot easier knowing that I have Training 2000 with me from the very first phone call at the start of an apprentices journey right through to full qualification. ”

Alan Taylor, Perrys Blackburn

## THE APPRENTICESHIP REFORMS - WHAT YOU NEED TO KNOW?

- Employers whose pay bill is greater than £3 million will have to pay the Levy. The Levy is charged at 0.5% of employers pay bill and paid to HMRC through PAYE process alongside tax and NIC
- The Government will pay £1000 to employers if they train a 16-18 year old apprentice.
- Non levy paying businesses, those with an annual pay bill less than the £3 million threshold, that have more than 50 employees, or businesses that have used their levy pot, will have to make a contribution of 10% towards the cost of apprenticeships.\*
- Employers with fewer than 50 employees will have 100% of the training and assessment costs covered when training a 16-18 year old.\*
- From May 2017, an individual can be funded to undertake an Apprenticeship at the same or lower level to acquire substantive new skills

**Training 2000 will offer you help and guidance with the reforms tailored to your businesses individual needs. For more information please visit our website [www.training2000.co.uk/reform](http://www.training2000.co.uk/reform)**

## WHAT ARE APPRENTICESHIPS?

Apprenticeships are a unique way to grow your workforce by combining working with practical training.

Training 2000's Automotive Apprenticeships are about long term workforce development, to ensure sector specific technical and practical skills remain in the UK. Training 2000 works closely with employers and sector skills councils to develop Apprenticeships that meet the current and future needs of your industry.

One of the most common things we hear from employers is that they struggle finding young people who are ready for work or whose skills fit in with the modern automotive industry. Our Apprenticeships solve this problem by teaching both technical and employability skills.

An automotive apprentice is required to spend 20% of their Apprenticeship completing off the job work such as attending training and completing portfolio work. Shadowing and mentoring within the workplace can also count towards the 20%. This must form part of their working hours.

## WHY EMPLOY AN APPRENTICE?

By employing an apprentice you are investing not only in their future, but also that of your business and the UK economy. Apprentices are the future of the industry.

The many benefits of employing an apprentice within your business include:

- Training apprentices produces workers with skills that are not available on the external jobs market, allowing businesses to shape their workers into precisely the right people for the job
- Apprenticeships enable you, the employer, to introduce new talent to the business; ensuring that skills and experience are passed on through your workforce

### NEW APPRENTICESHIP STANDARDS

Heavy Vehicle Service and Maintenance Technician	Level 3
Motor Vehicle Service and Maintenance Technician	Level 3

### EXISTING APPRENTICESHIP FRAMEWORKS - NEW STANDARDS IN DEVELOPMENT

Mechanical, Electrical & Trim (MET) Apprenticeship	Level 2 & 3
