

INTRODUCTION TO MULTI-AXIS MACHINING

Cost:

£750 plus VAT

Level:

3/upskilling

Duration:

5 days

Overview:

Introduction to multi-axis machining (operating)

Course objective: Delegates with limited machining experience will learn to safely operate a complex machining centre to maximise quality and performance, safely set and operate a multi-axis machining centre. Delegates will be able to select and run a CNC program utilising 5 axis capabilities.

Who is it for?

Target group: Apprentices, operators, team leaders and CNC Machining Engineers wanting to upskill and expand their capability to include multi-axis machining.

Method of delivery?

Delivered in centre at the AMAC Blackburn
